

meme_maker.html

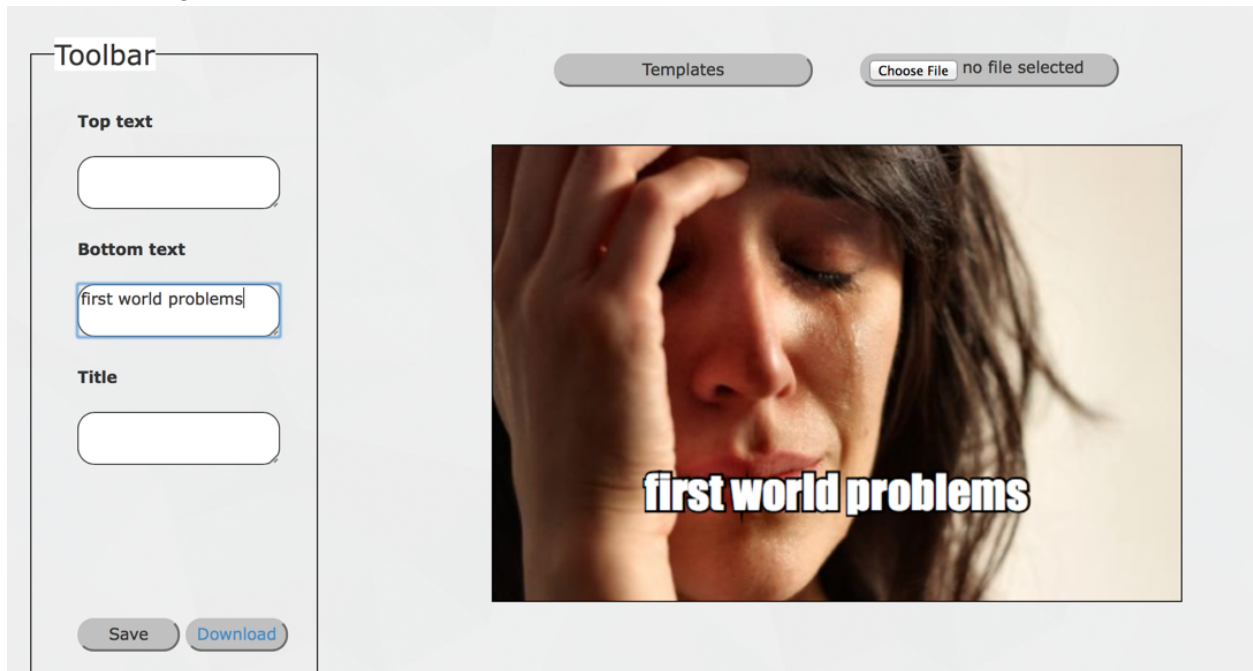

Meme_maker can be access with the create tab. It allows users to create their own memes.

Selecting the templates button:

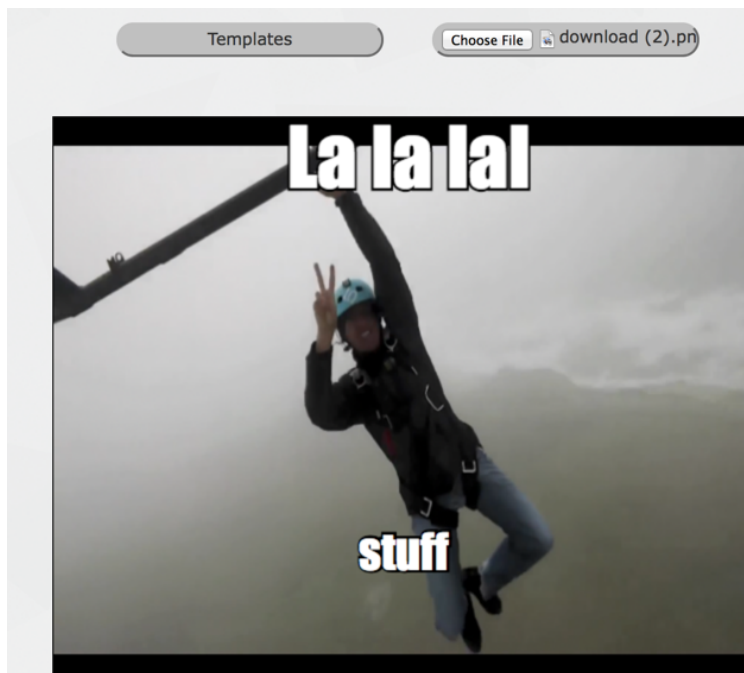

will prompt you with a screen full of todays most popular meme templates. You can escape this screen by pressing esc, clicking outside the screen, or selecting a template.

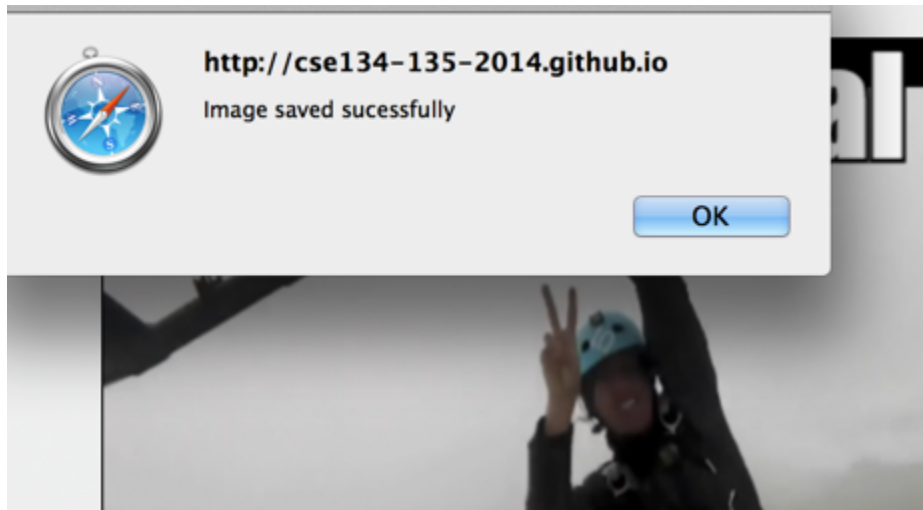

After selecting a template:

You can type out the top and bottom text. This text appears on the canvas as you begin to type. It also supports multi line phrases. The title tag gives your document a title in our database as well as title if you decide to download it.

Aside from selecting a template, users can choose to select one of their own images

clicking on the save button stores the image into the users profile gallery. And the download button will start a download of the image.
