

# MemeMaster Chrome Extension

Once the user clicks on the chrome extension link, they will download MemeMaster's chrome extension. Once the file is downloaded open chrome://extensions and drag the file into the browser window.

Once the chrome extension is loaded, just clicking on it will open a window with 2 options. First off, all of the images from the page the user is currently looking at will populate the extension, along with buttons for each to add to their MemeMaster account. The other option is to drag or paste a URL into the dialog box, this will add even more images into the extension
